

Helping Those Who Help Others...

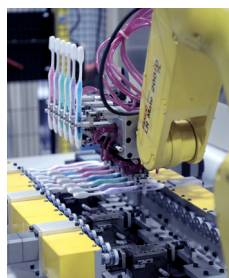

is what drives TEAM Technologies to bring together a portfolio of solutions to solve the Oral Healthcare Industries' most complex challenges.

From concept to commercialization, TEAM Technologies offers the technology and support services for every stage of the development and manufacturing processes for your oral device.

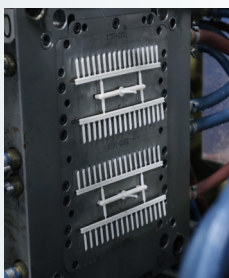

Product Design & Development

Whether you are in need of a finished piece or OEM part, our team of R&D and design center experts offers the ability to help bring your vision to life with capabilities that include piece and part engineering, mold design engineering, rapid prototyping, quick sampling, equipment design, and customization.

Assembly

TEAM Technologies streamlines the production process by offering manual, semi-automated and fully automated component and finished device assembly. This includes multiple-piece part assembly for custom and standard equipment, sonic welding, multi-functional applications such as RFID, kitting, as well as cleanroom and white room assembly.

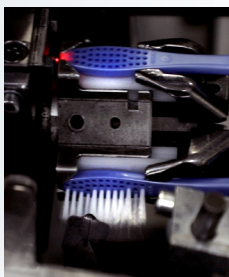

Molding

To help meet the highest standards while remaining cost competitive, TEAM Technologies utilizes state-of-the-art equipment and expertise to provide mold fabrication and maintenance injection molding, two and three component molding, insert molding, thin wall molding, as well as rubber compression molding.

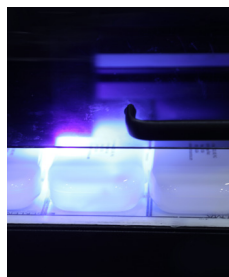

Packaging

TEAM Technologies delivers on our customers' needs for high-speed, custom packaging solutions. We offer form, fill, and seal blister packaging, RF seal, cello wrapping, unit box cartooning, auto bagging, custom blisters, and promotional corrugated builds and also can provide cleanroom and white room assembly services.

Bristling

Producing brushes for today's healthcare, oral care, and dental care industries requires a unique set of capabilities and technologies. That's why TEAM Technologies provides staple-set to allow for single to hundreds of tufts, molded-in (IMT, AFT, and custom versions), to accommodate a wide variety of brushes.

Decorating

From imprinting your product with your brand name, logo or design, to filling tubes or bottles with pastes or solutions, TEAM Technologies provides the finishing touch. Our services include digital imprinting, laser decorating, pad printing, hot stamping, sleeving, and flocking as well as mixing and filling for products such as denture adhesives and sprays.

Finished Products Include:

Class-Leading Toothbrushes (Staple-Set & In-Molding) | Electric Brush Head Replacements
Disposable Prophylaxis Angles | Prophylaxis Cups | Flossers & Dental Picks | Denture Paste | Orthodontic Kits
Professional Whitening Kits | Retail & Shelf Ready Packaging | Paste & Mouthwash Bundling

ISO 13485 | ISO 9001 | Class 7 & Class 8 Cleanroom Capability | US Manufacturer
