

TEAM Technologies is committed to Helping Those Who Help Others by manufacturing pharmaceutical delivery devices built to be both accurate and precise, ultimately improving the patient experience.

Our customer-centric approach means we partner with you at every stage of development to create innovative solutions that improve patient outcomes.

Leverage the proven track record of TEAM Technologies to rapidly take your pharmaceutical delivery device from concept to commercialization all under ISO 13485 and FDA regulated guidelines.

Engineering and Design

Our engineering and design team is committed to the highest quality standards and strategize with you in the early stages to develop devices that are safe and maximize the patient's treatment efficacy. Paying strict attention to the bottom line, our experts help bring your dosing device to market efficiently and quickly by employing our innovative approach to project management.

Prototyping

From rapid prototyping to the development of pilot production processes, our team works with you to explore product designs and test alternative methods while adhering to device specifications and regulatory compliance requirements.

Injection Molding

From custom molds for prototypes to large-scale finished products, our state-of-the-art equipment allows us to fabricate custom plastic parts that meet the precise tolerances needed for your pharmaceutical delivery device.

Materials Knowledge

TEAM Technologies works with thousands of advanced materials and has developed strong relationships with leading suppliers, allowing us to provide the best solution for each customer's unique needs.

Value-Added Customization

Let us provide the finishing touch by imprinting your product with your brand name, logo or design. We offer decorating specialties such as digital imprinting, laser decorating, pad printing, hot stamping and sleeving.

Assembly and Packaging

We offer form, fill and seal pouching in a cleanroom environment for medically validated packaging as well as boxing, coding and packing of finished products providing value through efficient processes. TEAM Technologies delivers our customers' need for high-speed, custom packaging and fulfillment.
